

# IMPEX COLOR s.r.l.

## PRODUCT DATA SHEET

# STUCCO ORO (gold) – ARGENTO (silver)

### CHARACTERISTICS

**Stucco Oro – Argento** is a decorative stucco made out of lime putty and selected mineral aggregates, to which special gold – silver pigments are added, suitable for achieving spatulated finishes with gold – silver glints on lime based plasters and various interior, properly prepared, walls.

### COMPOSITION

Seasoned slaked lime, calcium carbonate, special additives of vegetable and mineral origin, special gold – silver pigments.

### APPLICATION

Carefully clean the support and, if necessary, apply our Wall Base 025 primer.

Next apply an initial coat of **Stucco Antico** and, when it is dry, apply the second and third coat using Stucco Oro – Argento, achieving a glossy, spatulated effect with gold – silver glints.

Polish the surface, but it is not necessary to insist too much on passages.

Stucco Oro – Argento can also be applied only as a finishing coat, achieving a very delicate gold – silver effect.

### PRECAUTIONS FOR USE

Caustic, irritant product – keep away from eyes – if it comes into contact with the eyes, wash abundantly with water and consult a doctor.

### YIELD

This varies based on the base and number of coats applied, generally about from 0,3 to 0,6 Kg/sq.m.

### PACKAGE

Tins of 1 Kg. and 5 Kg.

Keep the material in dry places with a temperature of more than + 5 °C.
